HOORVIA - SOURDOUGH FEEDING CHART: PRINTABLE RATIOS GUIDE

Quick Reference Cheat Sheet · US Letter Printable

Kitchen & Cooking · Sheet #1

Feeding	Ratio	Starter : Flour : Water	Schedule	Note
Daily room-temp	1:1:1	50g : 50g : 50g	Once a day	Standard maintenance
Twice-daily	1:1:1	50g : 50g : 50g	Morning + evening	Warm kitchens
Fridge maintenance	1:2:2	25g : 50g : 50g	Once a week	Then back in the fridge
Reviving from fridge	1:2:2	25g : 50g : 50g	Two feeds	Before baking
Pre-bake build	1:2:2	50g : 100g : 100g	8-12 hrs before mixing	Peaks at bake time
Stiff starter	1:2:1	50g : 100g : 50g	Once a day	Slower rise, milder sour
Liquid starter	1:2:3	50g : 100g : 150g	Once a day	Faster rise, more sour
Whole wheat feed	1:1:1	50g : 50g : 50g	Once a day	More food for the yeast
Rye feed	1:1:1	50g : 50g : 50g	Once a day	Boosts a sluggish starter
Discard	-	Half the starter	Before each feed	Use it in pancakes, crackers
Peak check	-	Doubled + domed	4-8 hrs after feeding	Float test: drop in water
Hooch	-	Liquid on top	When hungry	Stir in or pour off

PRO TIP: Discard before every feed: Skipping the discard means the jar overflows and the yeast starves. Discard half, then feed - and bake with the discard.
