HOORVIA - STROKE SCALING GUIDE: PRINTABLE ILLUSTRATOR CHART

Quick Reference Cheat Sheet · US Letter Printable

Tech & Software · Sheet #1

Situation	Setting	What Happens	Tip
Scaling a shape	Scale Strokes off	Stroke stays the same width	Default behavior
Scaling a shape	Scale Strokes on	Stroke scales with the shape	Check in Preferences
Resizing with the bounding box	Scale Strokes off	Stroke stays fixed	Good for icons
Resizing with the bounding box	Scale Strokes on	Stroke grows / shrinks	Good for logos
Scaling text	Scale Strokes on	Outline strokes scale too	For outlined text
Scaling a group	Scale Strokes on	All strokes scale together	Check the group first
Stroke weight too thin	Increase weight	Thicker line	Use 1pt minimum for print
Stroke weight too thick	Decrease weight	Thinner line	Use 0.5pt for fine details
Dashed stroke scaling	Scale Strokes on	Dashes scale too	Dashes stay proportional
Dashed stroke scaling	Scale Strokes off	Dashes stay fixed	Dashes look wrong at scale
Scaling for print	Scale Strokes on	Print size matches	Check the actual size
Scaling for web	Scale Strokes off	Pixel-perfect strokes	Keep strokes at whole pixels

PRO TIP: Check the setting before you scale: The Scale Strokes checkbox is in Preferences > General and in the Transform panel. Check it before you scale - fixing it after means rescaling.
