HOORVIA - HTML TABLES: PRINTABLE TAG & ELEMENT GUIDE

Quick Reference Cheat Sheet · A4 Printable

Tech & Software · Sheet #1

Element / Attribute	Tag	What It Does	Example
table	<table>	Container for the whole table	<table>...</table>
tr	<tr>	A table row	<tr><td>...</td></tr>
td	<td>	A data cell	<td>Price</td>
th	<th>	A header cell	<th>Name</th>
thead	<thead>	Header rows group	<thead><tr>...</tr></thead>
tbody	<tbody>	Body rows group	<tbody><tr>...</tr></tbody>
tfoot	<tfoot>	Footer rows group	<tfoot><tr>...</tr></tfoot>
caption	<caption>	Table title	<caption>Sales 2026</caption>
colspan	colspan="2"	Cell spans columns	<td colspan="2">
rowspan	rowspan="2"	Cell spans rows	<td rowspan="2">
scope	scope="col"	Links header to cells	<th scope="col">
border-collapse	CSS	Merges cell borders	border-collapse: collapse;

PRO TIP: Use th for headers, not bold td: A th tells screen readers the cell is a header; a bold td does not. Add scope="col" or scope="row" so readers know which cells it labels.
