Save file	Ctrl+S	Save often - Blender crashes happen

PRO TIP: Print on US Letter or A4 and keep it beside your keyboard while you learn Blender - this is not a sheet to read once and file, it is a reference to glance at mid-task. Use "Save as PDF" in the print dialog for a PDF copy in Letter or A4, and laminate it if it will sit next to a mouse and coffee, as most beginner Blender sheets do. Highlight the navigation row and the G/R/S row first, because those two groups cover most of what a beginner does in the first weeks, and the rest can be learned gradually.
