400°F / 204°C oven	200°C / Gas 6	Roasting temperature
425°F / 218°C oven	220°C / Gas 7	-

PRO TIP: Print this conversion sheet on US Letter or A4 and fix it where you measure - inside a cupboard door above the counter, on the fridge, or in the front of a recipe binder. In the print dialog, choose "Save as PDF" for a digital copy and set Letter or A4 to match your paper. A laminated copy is ideal because measuring cups, flour dust and wet hands are a constant threat to paper, and this is the sheet you will reach for most often when a recipe comes from another country. If you print it small enough to fit a binder, keep the font readable; a tiny chart you cannot read at arm's length will not get used.
