# HOORVIA - MEAT INTERNAL TEMPERATURE CHART

Quick Reference Cheat Sheet · US Letter Printable

Kitchen & Cooking

| Meat | Safe Minimum | Rest | Notes |
|---|---|---|---|
| **Beef steak / roast** | 145°F / 63°C | 3 min | Medium-rare is a preference above this minimum, not below it |
| **Lamb steak / roast** | 145°F / 63°C | 3 min | Same minimum as beef |
| **Pork chops / roast / tenderloin** | 145°F / 63°C | 3 min | A little pink at 145°F / 63°C is safe after resting |
| **Ground beef / pork / lamb** | 160°F / 71°C | - | Grinding mixes surface bacteria through the meat |
| **Ground turkey / chicken** | 165°F / 74°C | - | Check several spots |
| **Chicken breast / thigh** | 165°F / 74°C | - | Thickest part, away from bone |
| **Whole chicken / turkey** | 165°F / 74°C | 15-20 min | Check inner thigh and breast |
| **Duck breast** | 165°F / 74°C | 5 min | Follow poultry guidance for safety |
| **Fish fillet / steak** | 145°F / 63°C | - | Or until flesh flakes easily |
| **Shrimp / lobster / crab** | 145°F / 63°C | - | Flesh pearly and opaque |
| **Ham (pre-cooked, reheat)** | 140°F / 60°C | - | Fresh ham: cook to 145°F / 63°C + 3 min rest |
| **Leftovers / casseroles** | 165°F / 74°C | - | Reheat until steaming throughout |

**PRO TIP:** Print this chart on US Letter or A4 and put it where you actually cook - on the fridge, inside a spice cupboard, or beside the grill. Use the browser print dialog and choose "Save as PDF" if you want a digital copy, selecting Letter for North America or A4 for the UK. Because this chart lives near heat, steam and raw-meat hands, laminate it or slip it into a clear plastic sleeve; you can then wipe it clean and it will last through many barbecues and roast dinners. A faded, stained chart nobody can read is worse than no chart, so replace it when the numbers get hard to see.
