Medicine 5 - Morning [ ] Afternoon [ ] Evening [ ] Night [ ]	[ ][ ][ ][ ]	[ ][ ][ ][ ]	[ ][ ][ ][ ]	[ ][ ][ ][ ]	[ ][ ][ ][ ]	[ ][ ][ ][ ]	[ ][ ][ ][ ]
Notes / symptoms / missed dose reason	Write notes here each day - e.g. felt dizzy, missed evening dose, new prescription started.						

PRO TIP: Print a fresh sheet every Monday on US Letter or A4 - choose "Save as PDF" in the print dialog if you want a PDF copy, and set Letter or A4 to match your paper. Keep the current week on the fridge, on a bedside table, or inside a pill organiser lid, where it is seen at dose times rather than filed away. Print several weeks at once and store them in a folder, so a new week is always ready and you never have to reprint in a rush. If you laminate one copy, use a dry-erase marker for a reusable week, but keep a paper copy for appointments, because doctors often want to keep the record.
