PRO TIP: Print on US Letter or A4 and keep it beside your keyboard, or pin it to a cubicle wall where you can glance at it without switching windows. Use "Save as PDF" in the print dialog for a PDF copy in Letter or A4, and laminate it if your desk gets coffee rings - this is a sheet you will reach for daily in the first weeks of learning formulas. A second copy in a notebook is useful for remote work days, when the office wall chart is not beside you. Print it in colour if you can, but it remains readable in black and white because the structure is in the table, not the colour.
