PRO TIP: Print on US Letter or A4 and keep it near your desk for the first weeks of using Sheets formulas seriously, or save the PDF version via "Save as PDF" in the print dialog (Letter or A4) for a second screen. A printed sheet is still useful even for a cloud tool, because it stops you breaking concentration to search the same QUERY syntax for the tenth time. Laminate it if it will live on a busy desk, and highlight QUERY, IMPORTRANGE and ARRAYFORMULA - the three formulas that most separate a casual Sheets user from a confident one.
