HOORVIA - RULE OF 72 CHART: PRINTABLE COMPOUND DOUBLING GUIDE

Quick Reference Cheat Sheet · US Letter Printable

Reference Charts · Sheet #1

Return Rate	Rule of 72 (Years)	Exact Time (Years)	Error	$10,000 in 24 Years	Typical Investment
1%	72.0	69.66	+3.4%	$12,697	Cash below inflation
2%	36.0	35.00	+2.8%	$16,084	High-yield savings / money market
3%	24.0	23.45	+2.3%	$20,328	Short-term bonds / CDs
4%	18.0	17.67	+1.8%	$25,633	Treasury notes / high-grade bonds
5%	14.4	14.21	+1.3%	$32,251	Balanced income portfolio
6%	12.0	11.90	+0.8%	$40,489	Conservative 60/40 portfolio
7.2%	10.0	9.97	+0.3%	$53,109	S&P 500 real return (long term)
8%	9.0	9.01	-0.1%	$63,412	Global total stock market index
9%	8.0	8.04	-0.5%	$79,111	Growth stock index
10%	7.2	7.27	-1.0%	$98,497	S&P 500 nominal return (1926-2025)
12%	6.0	6.12	-1.9%	$152,196	Aggressive small-cap / tech growth
15%	4.8	4.96	-3.2%	$286,252	High-growth / venture-style equity

PRO TIP: The rule is most accurate at 6-10%: Between 6% and 10% the error stays under 1%, which covers most long-term portfolios. Below 3% or above 12%, use the exact logarithmic time instead.
