HOORVIA - RV SETUP & DUMP STATION CHECKLIST: PRINTABLE STEP GUIDE

Quick Reference Cheat Sheet · A4 Printable

Reference Charts · Sheet #1

Phase	Task	How	Watch Out
Arrival	Level the RV	Bubble level on the floor	An unlevel RV strains the fridge
Arrival	Chock the wheels	Chock both sides of one axle	Prevents rollaway
Arrival	Unhitch & stabilize	Lower stabilizer jacks	Jacks stabilize - they never lift
Hookups	Connect water	White hose to city water inlet	Use a pressure regulator (40-50 PSI)
Hookups	Connect electric	30A or 50A to the pedestal	Check the pedestal breaker first
Hookups	Connect sewer	Sewer hose to the dump inlet	Keep a downward slope, no sags
Setup	Extend slides	Slides out after leveling	Check for branches and clearance
Setup	Awning & outdoor gear	Extend awning, set chairs	Stake the awning in wind
Dump	Empty black tank first	Open black valve, drain fully	Black first, gray second
Dump	Empty gray tank second	Open gray valve to rinse the hose	Gray water flushes black residue
Dump	Flush & rinse	Rinse hose with fresh water	Never use the drinking hose here
Departure	Disconnect in reverse	Sewer, electric, water - then hitch	Walk around once before driving off

PRO TIP: Black first, gray second: Gray water rinses the hose after the black tank drains. Reversing it leaves black residue in the hose and a smell you will not forget.
