HOORVIA - PHOTOSHOP SELECTION TOOLS: PRINTABLE GUIDE

Quick Reference Cheat Sheet · A4 Printable

Tech & Software · Sheet #1

Tool	Shortcut	What It Does	Best For
Rectangular Marquee	M	Rectangular selections	Cropping, straight edges
Elliptical Marquee	M (Shift+M)	Elliptical selections	Circles, eyes, wheels
Lasso	L	Freehand selections	Rough outlines
Polygonal Lasso	L (Shift+L)	Straight-line segments	Buildings, angular shapes
Magnetic Lasso	L (Shift+L)	Snaps to high-contrast edges	High-contrast edges
Quick Selection	W	Paints a selection over an area	Fast subject selection
Magic Wand	W (Shift+W)	Selects similar colors	Solid backgrounds
Object Selection	W (Shift+W)	AI-detects subjects and objects	People, animals, objects
Pen	P	Precise vector paths	Product cutouts
Select Subject	-	AI selects the main subject	One-click portraits
Select and Mask	-	Refines edges, hair, and fur	Hair, fur, fine edges
Color Range	-	Selects by color range	Skin tones, skies

PRO TIP: Feather by 1-2 pixels: A one-pixel feather softens the cut edge so the selection blends into its new background. Zero feather leaves a hard, fake-looking line.
