HOORVIA - WEBSITE MASTER LAYOUTS CHART: PRINTABLE PAGE LAYOUT PATTERNS

Quick Reference Cheat Sheet · A4 Printable

Tech & Software · Sheet #1

Layout Pattern	Structure	Best For	CSS Technique
Single-Column	One vertical stack: header, sections, footer	Blogs, articles, mobile-first pages	max-width + margin: auto
Two-Column Split	Text beside image, 50/50	Landing pages, feature stories	Flexbox (two flex: 1 items)
Three-Column Grid	Three equal columns of cards	Services, products, pricing tables	Grid: repeat(3, 1fr)
Left Sidebar	Fixed nav column + main content	Docs, dashboards, blogs	Grid: 240px 1fr
Right Sidebar	Main content + complementary rail	News sites, blogs, profiles	Grid: 1fr 300px
Full-Screen Hero	Large headline + CTA over imagery	Homepages, product launches	min-height: 100vh, flex center
Alternating Split	Image/text sides swap each section	Feature tours, how-it-works pages	Flexbox + nth-child order swap
Card Grid	Repeatable cards that reflow	Portfolios, shops, testimonials	Grid: repeat(auto-fit, minmax(280px, 1fr))
Magazine	One lead story + smaller grid below	Editorial, news, magazines	grid-template-areas
Sticky Header	Fixed nav + anchor-linked sections	Long docs, one-pagers, FAQs	position: sticky; top: 0
Z-Pattern	Headline top, diagonal scan to CTA	Marketing landing pages	Full-width sections, big CTA buttons
Dashboard	Fixed sidebar + widget grid	Apps, analytics, admin panels	Grid + sticky sidebar

PRO TIP: Start Mobile-First: Design the single-column stack first, then add columns at larger breakpoints. If a layout fails when collapsed to one column, it was never sound.
