HOORVIA - CSS MEDIA QUERIES CHEAT SHEET: PRINTABLE RESPONSIVE GUIDE

Quick Reference Cheat Sheet · US Letter Printable

Tech & Software · Sheet #1

Media Query	Targets	Use Case
@media (max-width: 767px)	Phones	Base mobile layout adjustments
@media (min-width: 640px)	Large phones, small tablets	Widen columns and increase type size
@media (min-width: 768px)	Tablets and up	Two-column layouts, visible nav
@media (min-width: 1024px)	Laptops and desktops	Full multi-column grid
@media (min-width: 1280px)	Large desktops	Max-width content containers
@media (orientation: portrait)	Vertical screens	Stack content, bigger tap targets
@media (orientation: landscape)	Wide screens	Side-by-side layouts
@media (prefers-color-scheme: dark)	Dark-mode users	Dark theme color overrides
@media (prefers-reduced-motion: reduce)	Motion-sensitive users	Disable or soften animations
@media (hover: hover)	Mouse and trackpad devices	Hover effects are safe to show
@media (print)	Printed pages	Hide nav and ads, black on white
@media (min-resolution: 2dppx)	Retina and high-DPI screens	Serve sharper images and icons

PRO TIP: Go Mobile-First: Write the base styles for phones, then add min-width queries upward. It keeps CSS smaller and fixes the 'max-width maze' for good.
