HOORVIA - SEAFOOD COOKING TIME & TEMPERATURE CHART: PRINTABLE FISH & SHELLFISH GUIDE

Quick Reference Cheat Sheet · A4 Printable

Kitchen & Cooking · Sheet #1

Seafood	Thickness / Size	Cook Time	Internal Temp & Doneness
Salmon fillet	1 inch thick	10 min per inch at 425°F / 218°C	125-130°F / 52°C-54°C medium-rare; 145°F / 63°C FDA safe
Tuna steak	1 inch thick	2-3 min per side, hard sear	115-125°F / 46°C-52°C rare center
Cod / white fish	1 inch thick	10-12 min at 400°F / 204°C	145°F / 63°C; flesh flakes easily
Halibut steak	1 inch thick	10-12 min at 400°F / 204°C	135-140°F / 57°C-60°C; moist and just opaque
Shrimp (large)	16-20 count	2-3 min per side	Pink and C-shaped (tight O = overcooked)
Sea scallops	U-10 size	2-3 min per side, sear	Golden crust, translucent center
Lobster tail	6-8 oz	12-15 min at 425°F / 218°C	140-145°F / 60°C-63°C; meat opaque white
King crab legs	Thawed	6-8 min steaming	Heated through (sold pre-cooked)
Mussels	Fresh, debearded	5-7 min covered steam	Shells open; discard any that stay closed
Littleneck clams	Fresh	7-10 min covered steam	Shells open wide; discard closed ones
Oysters (baked)	On half shell	10 min at 450°F / 232°C	Edges curl and liquor bubbles
Calamari rings	Fresh	2-3 min fry or 30+ min braise	Tender; anything between = rubbery

PRO TIP: The 10-Minute Rule: Measure fish at its thickest point and cook about 10 minutes per inch of thickness at 400-450°F. This classic rule works for nearly every finfish fillet and steak.
