■ RICE-TO-WATER RATIO & COOKING TIMES MATRIX (ABSORPTION METHOD)

Rice Variety	Dry Rice Amount	Water / Liquid Ratio	Simmer Time	Rest / Steam Time
White Long-Grain / Jasmine	1 cup (185g)	1.5 Cups Water	15 minutes	10 min (Covered off heat)
Basmati Rice (Rinsed!)	1 cup (185g)	1.5 Cups Water	12–14 min	10 min (Do not peek)
Brown Long-Grain Rice	1 cup (190g)	2.25 Cups Water	40–45 min	10 min
Brown Basmati Rice	1 cup (190g)	2 Cups Water	35–40 min	10 min
Sushi / Short-Grain White Rice	1 cup (200g)	1.125 Cups Water (1 1/8 c)	18 min	15 min + Vinegar seasoning
Wild Rice Blend	1 cup (160g)	3 Cups Water	45–55 min	10 min (Drain excess water)
Arborio Rice (Risotto)	1 cup (200g)	3.5 to 4 Cups Warm Stock	18–22 min (Gradual)	2 min + Butter & Parmesan

■ DRY-TO-COOKED YIELDS & RICE PREPARATION RULES

Rice Type	1 Cup Dry Yields	Rinse Required?	Stirring Rule	Best Cooking Utensil
Jasmine / Long-Grain	3 Cups Cooked	Optional (Removes starch)	Never stir once simmering	Heavy-bottom pot w/ tight lid
Basmati	3 Cups Cooked	YES (Mandatory 20m soak)	Fluff with fork only	Wide saucepan
Brown Rice	3.5 Cups Cooked	Recommended	Stir once at midpoint	Deep saucepan
Arborio (Risotto)	2.5 Cups Creamy	NO (Keep surface starch)	Stir constantly (Releases starch)	Wide Saucier / Skillet

CHEF'S PRO TIP: Always rinse Basmati rice in cold water until the water runs completely clear, then soak it for 20 minutes before cooking. Rinsing removes excess surface starch that causes clumping, while soaking allows the grains to elongate evenly without breaking.
GRAIN & PASTA GOLDEN STANDARD: Always salt boiling water generously • Never rinse cooked hot pasta unless making cold salad • Rest rice covered off heat for 10 minutes.
