CHEF'S PRO TIP: Ditch the plastic pop-up timer! Factory pop-up timers are calibrated with a metal alloy that doesn't melt until 180°F–185°F—meaning by the time that little red stick pops up, your turkey breast is 20°F overcooked and bone-dry.
USDA SAFE MINIMUM INTERNAL TEMPS: All Poultry: 165°F (74°C) • Ground Beef/Pork: 160°F (71°C) • Whole Steaks, Chops, Roasts & Fish: 145°F (63°C) + 3-Min Rest
