# HOORVIA - USDA MEAT INTERNAL TEMPERATURE CHART: PRINTABLE SAFE TEMP REFERENCE

Quick Reference Cheat Sheet · US Letter Printable

**Kitchen & Cooking · Sheet #1**

| Meat / Protein | USDA Minimum Safe Temp | Chef Recommended | Rest Time |
|---|---|---|---|
| **Chicken & Turkey (all cuts)** | 165°F | 165°F (thighs 175°F for texture) | 5-10 mins |
| **Ground Beef, Pork, Lamb, Veal** | 160°F | 160°F | 3 mins |
| **Beef Steaks & Roasts** | 145°F | 130-135°F (medium-rare) | 5-10 mins |
| **Pork Chops, Roasts & Tenderloin** | 145°F | 145°F (slight blush is safe) | 3 mins |
| **Lamb Chops, Roasts & Leg** | 145°F | 130-135°F (medium-rare) | 5-10 mins |
| **Veal Chops & Roasts** | 145°F | 135-140°F (medium) | 5 mins |
| **Duck Breast** | 165°F (USDA poultry rule) | 135°F (medium-rare, chef style) | 5 mins |
| **Fish & Shellfish** | 145°F | 125-135°F (flakes easily) | Serve immediately |
| **Fresh Ham (uncooked)** | 145°F | 145°F | 3 mins |
| **Fully Cooked Ham (reheat)** | 140°F | 140°F | 5 mins |
| **Leftovers & Casseroles** | 165°F | 165°F, bubbling throughout | 2 mins |
| **Egg Dishes & Quiches** | 160°F | 160°F, fully set | Serve hot |

**PRO TIP:** Measure the Thickest Part: Insert your thermometer into the thickest part of the meat without touching bone - bone conducts heat and gives falsely high readings that can leave the center undercooked.
