HOORVIA - VEGETABLE PLANTING CALENDAR: PRINTABLE GUIDE

Quick Reference Cheat Sheet · US Letter Printable

Home, Family & Health · Sheet #1

Vegetable / Crop	Planting Season / Soil Temp	Plant Spacing (In Row)	Row Spacing	Days to Harvest
Tomatoes (Indeterminate)	Spring (Soil >65°F / 18°C)	24 - 36 inches	36 - 48 inches	70 - 85 Days
Bell Peppers	Spring (Soil >65°F / 18°C)	18 - 24 inches	24 - 30 inches	65 - 80 Days
Carrots	Early Spring & Fall (Soil >45°F)	2 - 3 inches	12 - 18 inches	60 - 75 Days
Spinach & Leaf Lettuce	Early Spring & Autumn (Soil >40°F)	4 - 6 inches	12 - 15 inches	40 - 50 Days
Bush Beans	Late Spring (Soil >60°F / 16°C)	3 - 4 inches	18 - 24 inches	50 - 60 Days
Cucumbers	Late Spring (Soil >60°F / 16°C)	12 inches	36 - 48 inches	50 - 70 Days
Zucchini / Squash	Late Spring (Soil >60°F / 16°C)	24 - 36 inches	36 - 48 inches	45 - 55 Days
Broccoli	Early Spring & Fall (Soil >50°F)	18 inches	24 - 36 inches	60 - 80 Days
Onions	Early Spring (Soil >50°F)	4 inches	12 - 18 inches	90 - 120 Days
Potatoes	Early Spring (Soil >45°F)	12 inches	30 - 36 inches	70 - 120 Days
Corn (Sweet)	Late Spring (Soil >60°F / 16°C)	12 inches	30 - 36 inches	60 - 90 Days
Kale	Early Spring & Fall (Soil >45°F)	12 - 18 inches	18 - 24 inches	50 - 65 Days

PRO TIP: Plant by soil temp, not the date: Tomatoes want soil above 65°F; carrots germinate at 45°F. A soil thermometer costs a few dollars and prevents more failures than any other tool.
