HOORVIA - PINE SCRIPT V5 CHART: PRINTABLE TRADINGVIEW FUNCTIONS GUIDE

Quick Reference Cheat Sheet · A4 Printable

Tech & Software · Sheet #1

Function / Keyword	Syntax	What It Does	Example Use
//@version=5	//@version=5	Declares Pine Script v5	First line of every v5 script
indicator()	indicator("Name", overlay=true)	Creates an indicator	Plotting on the price chart
strategy()	strategy("Name")	Creates a backtestable strategy	Testing trading rules
plot()	plot(close)	Draws a line on the chart	Plotting closing prices
ta.sma()	ta.sma(close, 14)	Simple moving average	Trend lines
ta.ema()	ta.ema(close, 21)	Exponential moving average	Faster trend lines
ta.rsi()	ta.rsi(close, 14)	Relative Strength Index, 0-100	Overbought and oversold signals
ta.crossover()	ta.crossover(a, b)	True when a crosses above b	Buy signals
ta.crossunder()	ta.crossunder(a, b)	True when a crosses below b	Sell signals
strategy.entry()	strategy.entry("Long", strategy.long)	Opens a position	Entering trades
alert()	alert("msg", alert.freq_once_per_bar)	Triggers an alert	Notifications
var	var float x = na	Variable that keeps its value	Counters and state tracking

PRO TIP: Always start with version 5: The //@version=5 header must be the first line or v5 functions will not compile.
