HOORVIA - PIVOT TABLE CHART: PRINTABLE EXCEL PIVOT TABLE GUIDE

Quick Reference Cheat Sheet · A4 Printable

Tech & Software · Sheet #1

Step / Feature	Where / How	What It Does	Tip
Select your data	Click inside the data range	PivotTable reads headers as fields	Include headers, no blank rows
Insert PivotTable	Insert > PivotTable	Opens the field pane	Choose New or Existing Worksheet
Rows area	Drag a field to Rows	Groups data by that field	E.g. Region, Product, Month
Columns area	Drag a field to Columns	Spreads values across columns	E.g. Year, Quarter
Values area	Drag a number field to Values	Aggregates the numbers	Default is SUM; switch to COUNT or AVERAGE
Filters area	Drag a field to Filters	Adds a top-level slicer	E.g. filter by one salesperson
Change summary	Value Field Settings	Switches SUM to COUNT, AVERAGE, MAX	Right-click a value cell
Group dates	Right-click date > Group	Rolls dates into months, quarters, years	Essential for time trends
Sort largest first	Right-click > Sort Descending	Ranks items by value	Top 10 products at a glance
Show as % of total	Value Field Settings > Show Values As	Converts values to percentages	Share of total sales
Refresh data	Data > Refresh All	Updates the pivot after source edits	Or right-click > Refresh
Slicers	Insert > Slicer	Adds clickable filter buttons	Faster than dropdown filters

PRO TIP: Start with clean data: One header row, no blank rows or merged cells, or the pivot will misread your fields.
