HOORVIA - PRESSURE CANNING ALTITUDE PSI CHART: PRINTABLE USDA GUIDE

Quick Reference Cheat Sheet · A4 Printable

Kitchen & Cooking · Sheet #1

Altitude Above Sea Level	Dial Gauge PSI	Weighted Gauge PSI	Water-Bath Time to Add	Rule
0-1,000 ft (0-305 m)	11 PSI	10 PSI	Standard time	No adjustment needed
1,001-2,000 ft (306-610 m)	11 PSI	15 PSI	+5 min	Dial stays 11; weighted jumps to 15
2,001-3,000 ft (611-914 m)	12 PSI	15 PSI	+5 min	Dial steps up 1 PSI
3,001-4,000 ft (915-1,219 m)	12 PSI	15 PSI	+10 min	Water-bath adds 10 min
4,001-6,000 ft (1,220-1,829 m)	13 PSI	15 PSI	+10 min	Dial steps up again
6,001-8,000 ft (1,830-2,438 m)	14 PSI	15 PSI	+15 min	High altitude: test dial gauge yearly
8,001-10,000 ft (2,439-3,048 m)	15 PSI	15 PSI	+20 min	Maximum dial setting
Above 10,000 ft (3,048 m+)	15 PSI + tested recipe	15 PSI	+20 min or more	Consult your local extension office

PRO TIP: Know your elevation first: Look up your town's elevation before canning - guessing the band is how food gets under-processed.
