HOORVIA - PUPPY VACCINE SCHEDULE CHART: PRINTABLE AAHA VACCINATION GUIDE

Quick Reference Cheat Sheet · A4 Printable

Home, Family & Health · Sheet #1

Age	Vaccine	Protects Against	Vet Notes
6-8 weeks	DHPP, dose 1	Distemper, adenovirus, parvo, parainfluenza	First vet visit; deworming usually starts here
10-12 weeks	DHPP, dose 2	Same four diseases	Keep boosters 2-4 weeks apart
12 weeks	Leptospirosis, dose 1	Leptospirosis bacteria in water and soil	Now core per AAHA 2024 update
14-16 weeks	DHPP, dose 3 (final)	Same four diseases	Most important dose - maternal antibodies faded
14-16 weeks	Leptospirosis, dose 2	Leptospirosis bacteria in water and soil	Given 2-4 weeks after dose 1
12-16 weeks	Rabies, dose 1	Rabies - fatal once symptoms appear	Required by law in most US states
16-20 weeks	Final DHPP if needed	Same four diseases	Only if the last dose was before 16 weeks
12-16 months	DHPP booster	Same four diseases	One year after the puppy series
12-16 months	Rabies booster	Rabies - fatal once symptoms appear	1-year or 3-year vaccine per local law
12-16 months	Leptospirosis booster	Leptospirosis bacteria in water and soil	Yearly if your vet recommends it
As needed	Bordetella (kennel cough)	Kennel cough from close dog contact	For daycare, boarding, or puppy classes
As needed	Lyme / canine influenza	Lyme disease / dog flu	Only in tick areas or before boarding

PRO TIP: Book the next visit before you leave: Puppy shots are a series, not a one-off - schedule the next booster at every appointment so no window slips.
