HOORVIA - QUINOA GUIDE: PRINTABLE COOKING RATIOS & TIMES CHART

Quick Reference Cheat Sheet · A4 Printable

Kitchen & Cooking · Sheet #1

Step / Item	Ratio / Time	What To Do	Result
Rinse	30 seconds	Rinse 1 cup dry quinoa under cold water in a fine sieve	Removes bitter saponin coating
Ratio (stovetop)	1 : 2	1 cup quinoa + 2 cups water or broth	Fluffy, separate grains
Ratio (firmer)	1 : 1.5	Less water for salads and grain bowls	Grains hold their shape
Simmer	15 minutes	Bring to a boil, lid on, low heat	Quinoa absorbs the liquid
Rest	5 minutes	Lid on, off the heat	Finishes steaming evenly
Fluff	Fork	Fluff gently and serve	Light, not gummy
Yield	1 cup dry -> 3 cups cooked	Plan 1/4 cup dry per person	Feeds 3-4 as a side
White quinoa	Mild, fluffy	Best all-rounder	Everyday cooking
Red quinoa	Nutty, firm	Holds shape in salads	Cold dishes
Black quinoa	Earthy, crunchy	Slowest to soften	Texture contrast
Storage (fridge)	5-7 days	Cool, airtight container	Meal-prep staple
Storage (freezer)	Up to 3 months	Freeze in flat bags	Thaw overnight

PRO TIP: Rinse every time: Rinse dry quinoa under cold water for thirty seconds in a fine sieve. Skipping the rinse leaves the bitter saponin coating on, and no amount of seasoning fixes it.
