HOORVIA - REGEX SYNTAX CHEAT SHEET: PRINTABLE PATTERN GUIDE

Quick Reference Cheat Sheet · US Letter Printable

Tech & Software · Sheet #1

Pattern	Matches	Example	Use For
.	Any single character (except newline)	a.c -> abc, a1c	Wildcard matching
\d	Any digit 0-9	\d\d\d -> 123	Numbers, years, codes
\w	Word character (letter, digit, _)	\w+ -> user_1	Usernames, identifiers
\s	Whitespace (space, tab, newline)	\s+	Splitting on spaces
[abc]	Any one of a, b, c	[aeiou] -> a vowel	Character sets
[^abc]	Any char except a, b, c	[^0-9] -> a letter	Exclusions
^	Start of string or line	^Hello	Anchoring a match
$	End of string or line	end$	Anchoring a match
*****	Zero or more of the previous	ab* -> a, ab, abb	Optional repeats
+	One or more of the previous	\d+ -> 42	Required repeats
?	Zero or one of the previous	colou?r -> color, colour	Optional parts
( ) and |	Grouping and alternation	(cat|dog)	Choices and capture

PRO TIP: Escape the dot: A plain dot matches any character, so \. is the only way to match a real full stop. Forgetting the backslash is the most common regex bug.
